

## **Pre-op Medication Instructions**

- Notify the office if you have any allergies including to latex products
- On the evening prior to the procedure take one dose of the antibiotic
- On the morning of the procedure, take one dose of the antibiotic and one Motrin 800mg.
- If you feel at all anxious you may take one **dose** of the sedative prior to coming in for your procedure. Bring the remaining medication with you. You will be given further instructions on whether to take more sedation upon your arrival at the Center.
- Postoperatively, take Motrin as needed for discomfort
- Continue to take the antibiotic as prescribed postoperatively until completed
- Notify the office if you experience any side effects from your medication
- If you are experiencing significant discomfort once you have completed taking your anti-inflammatory, contact our office for further instructions
